25X1A

1. It is reported that Fritz Selbmann's office in the DWK is dissatisfied with the organization of publicly-owned enterprises as recently undertaken. The DWK wished to group together enterprises producing the same goods, whereas the SMA wished to group together enterprises with complementary production, i.e. raw material, parts production, and finished product. The groups as finally constituted represent a compromise.
2. A list of groups subordinated to the Machinery & Electro-Technical Administration of the DWK is given in the attachment.

25X1A [REDACTED] Comment: There are divergences between this report and previous reports in the location of some group headquarters. It can only be assumed that they reflect differences of terminology in DWK documents of equal authenticity.
